---

Full Stack Web Developer with a background in Biological Sciences and Veterinary Medicine. Earned a certificate in Full Stack Web Development from the University of California, Davis Coding Bootcamp. Adept at working independently as well as within groups having multiple functions and tasks. Life long learner and always looking to understand and expand breadth of knowledge, no matter how difficult the task.

Technical Skills

Languages: HTML/CSS, JavaScript, JSON, jQuery, Node.js, ReactJS
Databases: MySQL, MongoDB,
Other: Algorithms, Coding, Data Structure, Heroku, Git, Microsoft Office Suite

---

Projects

FriendApp - Live Demo | Github Repository   **2021**
Full Stack Web Application that allows users to find friends by matching interests
- Worked together with a team in creating a full stack MERN application that allows users to find and make friends. Users create an avatar for their profile image, allowing users to match and chat before revealing their identity.
- Technologies Used: ReactJS, Node.js, Express, MongoDB, Mongoose, Socket.io, SnapKit, Multer, Next.js, Geocaching and React Bootstrap

WORM - Live Demo | Github Repository   **2021**
A digital bookshelf that lets users search for books based on their criteria
- Worked together with a team to create an application designed to store and share books using specific queries. This included designing a MySQL Schema to create a full stack application
- Technologies Used: HTML/CSS, JavaScript, jQuery, Node.js, Handlebars, Express, MySQL, Sequelize, Passport, Bootstrap, Heroku, JawsDB, Google Books API and NodeMailer

Livent - Live Demo | Github Repository   **2020**
A web application allowing users to search for live entertainment and events
- Worked together with a team to create an application that interacts with third-party services. Searches for live entertainment events within a defined radius to the user. Only relevant information for an event is listed. Directions to the event will be given using the Google Maps API.
- Technologies Used: HTML/CSS, JavaScript, Git, Geolocation, Google Maps API, PredictHQ API and GIF Maker

Experience

UC Davis Veterinary Medical Teaching Hospital   **2020-2021**
Client Services Representative   **Davis, CA**
Technical support liaison between veterinarians, referring veterinarians, clients and students

Key Accomplishments:
- Maintained a knowledge of small animal and exotic pet anatomy and medical terminology to provide general information to clients and make appropriate referrals
- Collected and processed payments for hospital services, processed medical records and made them retrievable, created appointments, invoices and discharges for patients and clients

Jefferson Park Veterinary Clinic   **2020**
Veterinary Assistant   **West Sacramento, CA**
Provided hands-on veterinary care to small animal patients
Key Accomplishments:
- Physical examinations, surgical procedures, immunizations, euthanasias in addition to client education, marketing and inventory maintenance
- Obtained, recorded and maintained accurate and descriptive medical records
- Performed routine laboratory procedures to assist in the diagnosis and treatment of small animal health problems, including hematology, urinalysis, radiographs and various cytologies

UC Davis Veterinary Medical Teaching Hospital   **2020**
Student Aide   **Davis, CA**
Assisted disabled fourth-year veterinary students with their clinical rotations
Key Accomplishments:
- Provided hands on, technical support to veterinary students in regards to patient handling and restraint, transportation and surgical preparation
- Participated in morning and evening rounds, helped evaluate prescribed medical treatments and pharmacy requests, liaison of hospitalization and discharge paperwork and procedures

Harbor Freight Tools   **2017-2019**
Senior Sales Associate   **Rocklin, CA**
Key Accomplishments:
- Supported the leadership team through the operational execution and delivery of a rewarding customer service experience, acting as a witness for till, safe and deposit counts
- Diligently executed company planograms, pricing, merchandise management processes and store/stockroom recovery standards
- Demonstrated exceptional customer service by quickly and efficiently communicating with customers in order to offer additional services, protections and warranties to protect purchases and acquisitions

VCA Loomis Basin Veterinary Clinic   **2013-2015**
Technician's Assistant & Outpatient Aide   **Loomis, CA**
Key Accomplishments:

- Directed maintenance protocols and ensured cleanliness of hospital by stocking medical supplies and equipment, sterilizing surgical instruments and providing nursing/husbandry care to hospitalized patientsSupported veterinarians and vet techs by assisting in medical procedures and animal restraint, all while upholding the highest standards of patient care, especially during volatile situations
- Maintained accurate patient history and medical records, prepared surgical suite and patients for exams and procedures, helped fill patient prescription medicines, performed laboratory work and diagnostic imaging
